

# Standard Fish Cleaning Tables

*Sturdy - Neat - Clean - Durable*

These fish tables are constructed with high quality materials. The cleaning surface is made with 1/2" or 3/4" King Starboard High Density Polyethylene (HDPE), an FDA approved cleaning surface. There are no cracks or crevices for bacteria to build up in. The framework is made of T6061 marine grade aluminum and TIG welded for strength and a clean finish. All fasteners are 316 grade stainless steel. The 2-Leg table projects out from the dock and mounts to the dock's substructure, taking up no dock space. Each leg comes with its own mounting bracket (vertical) and flange (horizontal), offering good stability.

Options include powder coating, knife rack, water bib and hose holder, enclosed base, and sink and faucet. Available surface sizes are 18" x 38" and 24" x 48" to 120" (in 24" increments).
